

Affiliate and Partner Onboarding SOP

Regenerative Revival. The standard path to set up any new partner or affiliate, from first conversation to live and paid.

The path is the same for every program. Only two things change per partner: the products (stem cells, peptides, or both) and the commission terms. Pick the matching agreement template and fill in Exhibit A. Anything that involves a new percentage deal should get compliance and legal review first (see the note at the end).

Stage 1 - Qualify and define

1. Identify the deal owner (Reggie, Jared, Seth, or the standard RR program) and the partner type (facility, gym, chiropractor or provider, influencer or creator, or standard affiliate).
2. Confirm the product scope: stem cells, peptides, or both.
3. Confirm the commission terms for this partner: the rate, whether it is one-time (stem cells) or recurring (peptides), and any owner override. If the terms are non-standard, get written approval from leadership before promising anything to the partner.

Stage 2 - Paper it

4. Pick the correct agreement template: the affiliate template (stem cell, peptide, or combined) for influencers and creators; the facility template for clinics and gyms; the provider template for a licensed provider like a chiropractor; or the business development rep agreement for a 1099 like Reggie or Jared.
5. Fill in Exhibit A with this partner's rate and payment terms. Exhibit B (compliance standards) stays as is.
6. Send for compliance and legal review, especially for any new percentage deal.
7. Send for e-signature. Collect the signed agreement and a completed W-9 before the first payout.

Stage 3 - Set up tracking

8. Create the partner's unique tracking link and/or code in Everflow.
9. Map the funnel in TyriaCore: lead capture and intake, confirm the referral attributes back to the partner, and confirm the conversion event fires (treatment booked or completed for stem cells; monthly order for peptides).
10. For peptide reps, issue the two codes (the 10% client code and the 40% personal-use code) and log them.

Stage 4 - Equip and launch

11. Send the approved marketing kit: compliant graphics and captions, the prohibited-language reminder, the FTC disclosure rule, and the candidacy disclaimer.
12. Brief the partner on the rules: no medical advice, no heal or cure language, always disclose the paid partnership, and send medical questions to intake.

13. Go live.

Stage 5 - Pay and maintain

14. Each month, pull sales in Everflow and verify completed and paid treatments before paying.
15. Apply clawbacks for any refunds or chargebacks within the refund window.
16. Pay on the agreed schedule (Net 30, or by the 15th for peptide reps) and send the partner a statement.
17. Review performance and renew or adjust. If rates change, update Exhibit A with a new signed Exhibit, with no need to redo the whole agreement.

Compliance reminder

Percentage commissions tied to completed medical treatments are legally sensitive (state fee-splitting, patient brokering, and anti-kickback rules). Get healthcare-specific legal review before launching new percentage deals, prefer flat fair-market-value fees where you can, and sign affiliates through the marketing or management entity. This is general information, not legal advice.
