LSR Media - ModFX - v2 build

Invited Margaret Northup justin@modfxmedia.com

Attachments  LSR Media - ModFX - v2 build  308redirect_modfx.pdf

Meeting records  Transcript  Recording

Summary

Project organization discussions established branding requirements and defined development strategies for integrating fulfillment and management systems.

Project Organization and Branding

The team adopted ClickUp for task management and defined the aesthetic goal as blending traditional telemedicine with a futuristic design style. Stakeholders identified hero video extraction as a primary requirement.

Redesign Strategy and Integration

Utilize AI to synthesize feedback and mockups for a master redesign draft. Prioritize front end design before integrating Wislow and TiaCore systems.

Timeline and Operational Goals

The team established a 6 week project schedule with a current goal to finish the design phase this week. Finalized the decision to prioritize front end completion before backend integration.

Rate this Summary: [Helpful](#) or [Not Helpful](#)

Decisions

We've **updated the Decisions section** using your feedback.

Let us know what you think: [Helpful](#) or [Not Helpful](#)

ALIGNED

- **AI-driven site redesign draft creation** The team will utilize AI to generate the initial first draft of the site redesign based on provided assets, mockups, and client feedback.
- **Project build and integration timeline** The project timeline is set to complete the design build and launch the live site within one week, followed by the commencement of integration work in the second week.

Next steps

- ☐ [Justin Ingram] Share Meeting Recording: Send the recording of this meeting to the team for reference and project documentation.
- ☐ [Justin Ingram] Clarify Product Pages: Consult Steve at Wizow to determine if the development team must build individual product pages or if the system handles them automatically.
- ☐ [Justin Ingram] Obtain Admin Login: Request the master admin login credentials for the Customer Relationship Management system from the client or relevant stakeholders.
- ☐ [Justin Ingram] Document CRM Details: Add the Customer Relationship Management system information to the project Google document to ensure the development team has the necessary integration details.
- ☐ [Margaret Northup] Provide Progress Update: Reach out by Friday to demonstrate the work completed by the development team and align on next steps.

Details

- **Project Management and Recording Setup:** Justin Ingram and Margaret Northup discussed the current project organization, noting that Margaret Northup has been using ClickUp to track tasks for the past two weeks ([00:00:00](#)). To facilitate a clear review of the build requirements, Justin Ingram invited Fireflies to record the meeting and shared the screen to walk through project assets ([00:04:30](#)).
- **Design and Branding Requirements:** Justin Ingram reviewed the current project assets uploaded to a Google Drive folder, which include brand guidelines, mockups, and notes ([00:05:58](#)) ([00:09:26](#)). The client requested that the site be elevated and include a specific hero video from their current site, which Mo and Brennan are responsible for extracting ([00:06:50](#)). The branding focuses on "Regen Revival," a stem cell therapy service, while layering in peptides and wellness offerings ([00:07:41](#)). The team aims to blend a traditional telemedicine aesthetic with the "futuristic" design style of the "Ways to Well" website ([00:08:35](#)).
- **AI-Assisted Redesign Strategy:** Justin Ingram and Margaret Northup discussed using AI to synthesize client feedback, existing mockups, and example sites to generate a master redesign draft ([00:10:53](#)). The strategy is to allow the AI to produce a high-quality first draft, which the team will then review with the client and refine during the development phase ([00:11:37](#)).
- **Wislow Integration and Product Pages:** Justin Ingram explained that Wislow acts as the fulfillment partner, handling telemedicine visits, white-labeling of products, and pharmacy coordination ([00:17:34](#)). Once the site is stable, the team will loop in Wislow for integration ([00:10:10](#)). Justin Ingram is contacting Steve, the owner of Wislow, to clarify whether the team must build individual product pages for the nearly 50 products or if the Wislow system handles that automatically ([00:12:19](#)).
- **Team Roles and Communication Channels:** Justin Ingram noted that the team communicates across various platforms, including Slack, WhatsApp, and Discord ([00:13:21](#)). Regarding responsibilities, Margaret Northup clarified that Brennan handles the structure and bones of the site, while Mo focuses on the design aspects ([00:16:38](#)). Other team members, including Farooq and Lelin, will contribute to the build and integration, though the immediate priority is the front-end design ([00:15:29](#)).
- **CRM Integration Strategy:** Beyond the design build, the team is required to integrate the site with the client's customer relationship management system,

TiaCore ([00:14:31](#)). The workflow involves capturing data from Wislow and pushing it into TiaCore to facilitate charting and patient record keeping. Justin Ingram intends to acquire the master admin login for TiaCore to ensure this backend integration can proceed ([00:17:34](#)).

- **Project Timeline and Next Steps:** Justin Ingram outlined a six-week project timeline, noting that the team is currently two weeks in. The objective is to complete the design phase and have a live site ready for client review by the end of the current week. The integration work is scheduled to follow as a subsequent phase ([00:18:34](#)). Margaret Northup committed to reviewing the team's progress by Friday to provide an update ([00:19:10](#)).

You should review Gemini's notes to make sure they're accurate. [Get tips and learn how Gemini takes notes](#)

LSR Media - ModFX - v2 build - Transcript

00:00:00

Justin Ingram: What going on young lady?

Margaret Northup: Hello.

Justin Ingram: How are you doing?

Margaret Northup: Good. How are you?

Justin Ingram: Good. Doing good.

Margaret Northup: Awesome.

Justin Ingram: Awesome. How's Brandon? He's Is he away from the home?

Margaret Northup: Yeah.

Justin Ingram: Getting some R.

Margaret Northup: Yeah. He went away, so we were trying to get everything set up for when he would leave.

Justin Ingram: Nice.

Margaret Northup: Um, so I think we're pretty set up.

Justin Ingram: Nice.

Margaret Northup: I mean, we recorded all his calls, so I was freaking out a little bit, but seems fine so far.

Justin Ingram: Do you feel like you got a good grasp on it so

Margaret Northup: So, yeah,

Justin Ingram: far?

Margaret Northup: I've used ClickUp before, so we've been getting everything into ClickUp like the last two weeks.

Justin Ingram: Nice.

Margaret Northup: So, that's been helping a lot. Um,

Justin Ingram: That's what we use. That's awesome.

Margaret Northup: there's still is it Do you like it?

Justin Ingram: It's a lot. It's very overwhelming,

00:04:30

Margaret Northup: There are so many things.

Justin Ingram: but yes.

Margaret Northup: It's so customizable.

Justin Ingram: Yep. Yeah.

Margaret Northup: What um what plan are you guys on?

Justin Ingram: I can't even tell you. We've been using it for so long.

Margaret Northup: Okay.

Justin Ingram: I don't even know.

Margaret Northup: Okay. Well, never mind.

Justin Ingram: I invited Fireflies to record this meeting.

Margaret Northup: Um okay,

Justin Ingram: So, can you let it in if you see it pop in?

Margaret Northup: let me Yeah,

Justin Ingram: Hopefully.

Margaret Northup: let me

Justin Ingram: I just kind of wanted to run through this together because I it's a little bit confusing even for me.

Margaret Northup: see.

Justin Ingram: So, I know it's going to be probably a little bit confusing initially.

Margaret Northup: Yeah,

Justin Ingram: So,

Margaret Northup: let me add fireflies. And then do you you could share your screen if you want or I could share mine.

Justin Ingram: okay.

Margaret Northup: What? Whatever is easier.

Justin Ingram: Yeah, I I think I'll share and you kind of run through it and that way we it's recorded.

00:05:04

Justin Ingram: we all got.

Margaret Northup: Okay.

Justin Ingram: I'll send over the recording of this meeting to you and the team and then we should be good.

Margaret Northup: Okay. Yeah. Let me hit record on here

Justin Ingram: Putting these in the finance

Margaret Northup: too.

Justin Ingram: drives. All right, cool. So, let me find that email thread. Change it to modifax site. Oh, that was that was one from earlier.

Margaret Northup: Yeah, there's the other thread. Um,

Justin Ingram: Don't need that one.

Margaret Northup: and then it's inviting.

Justin Ingram: There we go. I saw you sent me a reply email.

Margaret Northup: Okay.

Justin Ingram: So, let's just go ahead and walk through all this real quick here while we got the recording here.

Margaret Northup: Okay. Do you want to share?

Justin Ingram: Entire screen.

Margaret Northup: Oh, you are. Okay.

Justin Ingram: Yep.

Margaret Northup: Micromanage.

Justin Ingram: Tell me if I'm am I coming through my screen.

Margaret Northup: Um, yep.

Justin Ingram: Cool. Okay. Uh blow questions claw created for a call.

00:05:58

Justin Ingram: Okay. So, go away with the input of the dev team. Yep. Awesome. I love using Claude to answer this stuff. So, does the V2 Figma reflex test elevated full bleed wide glove con? I think it So, this is the thing. It It got really convol convoluted. Let me pull up the I think I sent you a whole Google Drive folder here. Uh where is that the documents?

Margaret Northup: Let me look for that too.

Justin Ingram: There we go. So,

Margaret Northup: Okay.

Justin Ingram: I sent here here's the pro project assets login. See this is the brief um build this is the

Margaret Northup: Was

Justin Ingram: brief I had AI send to you guys right from my all my notes and all my calls this is what they had sent um uh it's in the drive so I think

Margaret Northup: that sent to myself too or just Brennan? Oh, okay.

Justin Ingram: it's I'm I'm trying to remember does this I think

Margaret Northup: We're trying to

00:06:50

Justin Ingram: they yeah that was from May 17th so that was just yesterday I uploaded that and And this is the new mockup and this is like the main guide here. So mockup brand colors and guidance. So and then they sent me a slack and so this is where again I just wanted to get this recorded. So they sent this loom today and they're like can you just adjust to have the hero video Seth requested and then also a little more elevated. So they love the the video on their current site. For some reason they have like a heart on for that Margaret. So, this video they love.

Margaret Northup: So they like that the current video.

Justin Ingram: Um, yep. And I think I think Mo and Brandon said there was a way to extract this video.

Margaret Northup: Okay.

Justin Ingram: If if we can't, then I can try and find it. So, let me know about that. Um,

Margaret Northup: Okay.

Justin Ingram: and then they kind of liked the ways to well kind of site in in just terms of like the way it looked and feel.

00:07:41

Justin Ingram: I said this is like a super fancy site. Uh, obviously we can try and get some I do think the site looks awesome, you know. So maybe Mo and I I

Margaret Northup: Is it they like how all these pictures are like side by like they like the way

Justin Ingram: think so.

Margaret Northup: every

Justin Ingram: Yeah. So So So just to be clear,

Margaret Northup: Okay.

Justin Ingram: the brand Regen Revival is mostly about stem cells. He puts everybody to got stem cells.com, I think, is where he sends all his traffic.

Margaret Northup: Okay.

Justin Ingram: Got stem cells. Got stem cells.

Margaret Northup: Cool.

Justin Ingram: Let's see here. Got those. I'm just curious. He has like a top offunnel brand like got stem cells. It's on all his shirts and everything. Um I don't know where he I thought

Margaret Northup: That's cool.

Justin Ingram: I don't know what that's weird. Anyways, um he's a region first, but then now he's basically layering in peptides and like whole wellness services.

00:08:35

Justin Ingram: So the original site was all around region revival. Well, it's kind of like we wanted to be still region revival focused, but then it's like, oh, by the way, we offer peptides. you know, we have supplements, whatever is on there. You know, we have stem cell therapy. So, I think this is kind of the the overall kind of look and feel

Margaret Northup: ways to well.com.

Justin Ingram: that he liked. But then what pisses me off is like we spent I spent with a professional designer.

Margaret Northup: Okay.

Justin Ingram: I put this together, which is like your traditional tele medicine branded, you know, uh, website, right? So, that's is that you in there?

Margaret Northup: Where?

Justin Ingram: Oh, Lexi's in there. Okay. Yeah. So, and and they're and they're commenting and putting stuff in here.

Margaret Northup: Oh,

Justin Ingram: So, I think it's going to be like I don't know how the AI system works, but I think it's like a blend of like what we've built out here combined with

Margaret Northup: and Figma.

00:09:26

Justin Ingram: kind of the AI futuristic, you know, cool like responsive like I actually really like this. I think this looks really nice. So, if they could incorporate something like that, I think it's really cool. Um,

Margaret Northup: Okay. So,

Justin Ingram: and yeah,

Margaret Northup: Mhm.

Justin Ingram: and so that's kind of the idea. Then here's the brand colors and guidelines to feed the AI.

Margaret Northup: Oh, cool.

Justin Ingram: So hopefully Yep.

Margaret Northup: Okay. Yeah, I need to I need to find this in drive.

Justin Ingram: So yeah,

Margaret Northup: I'm looking right now.

Justin Ingram: I put I put it in the in the like the main Google doc.

Margaret Northup: Um

Justin Ingram: And then here's his brand assets um from Wizow.

Margaret Northup: Okay.

Justin Ingram: I I don't know why it says Wizow, but head shot, logos, all that stuff's in here. Brand guidelines.

Margaret Northup: And then from Wislow,

Justin Ingram: So all that's in here.

Margaret Northup: from Wislow, is there anything on our end? Do we need to like make a WLO account and get that set up or is that something your your team

00:10:10

Justin Ingram: Um, once we get the once we get the site where it's pretty good,

Margaret Northup: does?

Justin Ingram: I'll loop in Wizo and we'll all work together on that because that that part I've never done.

Margaret Northup: Okay.

Justin Ingram: I have no idea. Um,

Margaret Northup: Okay.

Justin Ingram: who on Brennan's team would be like the integration partner to connect to Wizo? Probably Brendan, huh, for that part of

Margaret Northup: Um, it it would either be Brennan or me where I would just set up a call and Brennan likes to do as little as possible with

Justin Ingram: it?

Margaret Northup: like other companies. So,

Justin Ingram: You're right.

Margaret Northup: it I you know, I could set up the call and if there's something where I don't know how to answer a question, then I would add Brennan to the call. He'll be back um next week.

Justin Ingram: Yeah.

Margaret Northup: So,

Justin Ingram: And and I think what it might not be a bad idea is like we just feed like his feedback here that he gave plus the mockups plus the loom.

00:10:53

Justin Ingram: I almost feel like we just just feed everything into like AI and get like a master like like spit out of the

Margaret Northup: Yep.

Justin Ingram: entire like redesign because again I like this for like traditional tele medicine. So I think it's like a blend of like the ways to well plus the Figma and like the product pages I think are

Margaret Northup: Your Figma. Yeah. Okay.

Justin Ingram: fine. I don't I don't necessarily think they had any feedback on the product pages. So I think the individual

Margaret Northup: So, it's kind of just incorporating the Figma mockup with ways to.com like how

Justin Ingram: part basically.

Margaret Northup: some of their

Justin Ingram: Yeah.

Margaret Northup: Okay,

Justin Ingram: And then just keeping his kind of you know video at the top because although it's like you guys

Margaret Northup: that

Justin Ingram: build has like nice videos and then they they liked some of the copy but you know the copy points are in here website

Margaret Northup: futuristic

Justin Ingram: copy. So I think that's a great place to start.

00:11:37

Justin Ingram: Um so I think it's pretty straightforward actually. I think we can just kind of let AI do like a really like good attempt first draft and then review it with the client and kind of and then just tweak it while it's you know in the dev state or whatever.

Margaret Northup: Okay. So,

Justin Ingram: Um attaches the product sheet for the peptides we links to what we be offering.

Margaret Northup: Mhm.

Justin Ingram: This does not include HRT and T but we should be receiving that. Okay, let me let me make sure we got this.

Margaret Northup: Do you mind sending me this link just because I can't find it and I just want to make sure before the end of the call

Justin Ingram: Uh

Margaret Northup: I have it?

Justin Ingram: yeah, I'm going to share this this whole folder with you. Share. Is it team? Is that Do you use the team?

Margaret Northup: That's um Lovelin. And then yeah, you could add Brennan. And mine is my first name, Margaret. Yeah.

00:12:19

Justin Ingram: Margaret.

Margaret Northup: At Lesser Media.

Justin Ingram: Margaret.

Margaret Northup: Jason.

Justin Ingram: Okay.

Margaret Northup: We always make a joke that I'm Jason.

Justin Ingram: Jason Bham. Is that the old sales guy?

Margaret Northup: Yeah.

Justin Ingram: That's funny.

Margaret Northup: Which I guess he was the guitarist of Paramore at one point,

Justin Ingram: Yeah,

Margaret Northup: so it's kind of cool.

Justin Ingram: I remember uh Brandon was telling me that and then um so I think that's that and then there was one more thing. Oh, that was what it was. Okay, so they said here the repeat MD uh and then attached to the product brochure. Okay, peptides. Okay, so this is all the Wizzlow stuff. So Wizzlo is going to be the ones that are like I wonder let me ask Steve here. Steve I'm gonna ask him real quick. Steve's the owner of Wizzlo.

Margaret Northup: Okay,

Justin Ingram: Hey Steve on the regen revival build for Seth.

Margaret Northup: cool.

Justin Ingram: Uh we were looking at the product pages. He's got like 50 almost 50 products he's going to be selling through I believe you guys.

00:13:21

Justin Ingram: Um, do we need to create specific product page on our end or does the WLO system do that? I guess let me get some clarity there so my team knows what to do. Thanks. All right.

Margaret Northup: Is this all in a folder? What you just sent? Okay.

Justin Ingram: Yep.

Margaret Northup: I'm just making sure I'm not losing

Justin Ingram: Yep.

Margaret Northup: anything.

Justin Ingram: All right. at Jared. These are the guys that are running the show over there for Seth.

Margaret Northup: Oh, nice.

Justin Ingram: Hey team, I have this comments on the build products.

Margaret Northup: So, does your team communicate through Slack?

Justin Ingram: Uh my team uses Google chat.

Margaret Northup: Is that Slack?

Justin Ingram: They use Slack. Then I use WhatsApp.

Margaret Northup: Okay.

Justin Ingram: Then I have Discord for you guys. It's crazy. Test.

Margaret Northup: I know.

Justin Ingram: This does not include the hott product. We should be shooting that this Monday. Do you have the balance of items like the hormone therapies finalized that we can get?

00:14:31

Justin Ingram: Thanks. Thanks. Okay. Yeah. So the I don't know. I guess there's a lot of products. So I'm guessing the AI can build the product pages kind of like what Brandon did for promise, you know. I'm guessing like the uh on this product page,

Margaret Northup: Okay.

Justin Ingram: I don't know how we customize it for each product, but let me get some

clarity there from Wizow. Um, but I'm guessing we would need to create a product page for each product on our end as part of your team, like Brennan's team doing the build. And then I think what's gonna happen is really Wislow all these call to action buttons are going to basically just feed them to like a Wizo form that the client fills out and then basically directs them to Wislow to do the tele medicine,

Margaret Northup: Okay.

Justin Ingram: the purchasing, the payment processing. And then the only other um part of this project outside of the design build is we need to integrate everything back into their CRM system which is the main part that I wanted Brennan's help with.

00:15:29

Justin Ingram: Um they use uh Tyia Tyia Tyia I think it's Tyia.app tyia core tia core.app app. Um,

Margaret Northup: Okay.

Justin Ingram: so I'm going to put this on the Google document as well,

Margaret Northup: Tyia core. Okay.

Justin Ingram: just so we're all clear.

Margaret Northup: Cool.

Justin Ingram: Uh, after design build is in live state, need to integrate with Wislow. All data from Wislow then needs to pass through to their CRM, which is at Brandon.

Margaret Northup: And so that part isn't anything. The initial team like Farooq and Lelin, they don't have to worry about that right now. That's at like

Justin Ingram: So yeah, right now we try to get the design build done.

Margaret Northup: Okay.

Justin Ingram: So like the front end facing, you know,

Margaret Northup: Oh,

Justin Ingram: and I think there's enough here with all the copy,

Margaret Northup: wow.

Justin Ingram: the mockups, the example sites. I think we have everything we need to get Mo on the front end done.

Margaret Northup: Yeah.

Justin Ingram: Then I guess does Farooq come in on the back end and do more design build or does he

00:16:38

Margaret Northup: Yeah. Um,

Justin Ingram: just do more like integrations SEO? Like what is Farukq's role? I guess I don't understand

Margaret Northup: just from what Brennan has said, um, because I haven't like seen proof work,

Justin Ingram: that.

Margaret Northup: he does all the like bones and structure I guess he says of like creating the site and then Mo comes in and does all the design stuff. So, I don't really know what that means.

Justin Ingram: You got

Margaret Northup: um you know but I guess the two of them work together and yeah

Justin Ingram: Let's say a client wants

Margaret Northup: we'll have this we'll have all the notes from yours and these documents

Justin Ingram: to keep or you know reuse the video and the header of the homepage of the current site. Okay.

Margaret Northup: they'll have this video too.

Justin Ingram: Can I put that on there?

Margaret Northup: So they'll have like the screen share

Justin Ingram: Yeah. And then I think I have a login.

Margaret Northup: video

Justin Ingram: Maybe maybe not.

Margaret Northup: criteria core.

00:17:34

Justin Ingram: Maybe not.

Margaret Northup: Okay.

Justin Ingram: Okay,

Margaret Northup: And that is their CRM,

Justin Ingram: I'll ask for that. Also,

Margaret Northup: right?

Justin Ingram: Shannon, yes. Can you resend me the master admin login

Margaret Northup: Oh.

Justin Ingram: criteria do test and so basically like you know not to get ahead but like

when someone orders something through region revival site Wizow is the fulfillment arm. So WizO is the person the company that does like the tele medicine visits the actual products they they coordinate with the pharmacies like they like white label all the fulfillment and so

Margaret Northup: Okay.

Justin Ingram: the goal is basically everything that happens with WLO and just pushes back to their CRM for like charting note taking

Margaret Northup: Okay.

Justin Ingram: processes I think Brandon will probably need to get involved and help me on that and then we can figure out how to disperse that part to the team that's more like

Margaret Northup: Yeah.

Justin Ingram: phase two so yeah exactly this is the white label

Margaret Northup: It's almost like Shopify but for medicine kind of.

00:18:34

Margaret Northup: Okay.

Justin Ingram: chify this in and we just need to push it back to like there go high level.

Margaret Northup: Okay.

Justin Ingram: We just need to push all the data from here back into like the equivalent of their go high level. So it's all on the patient records.

Margaret Northup: Okay. So, yeah, I'm sure I'm assuming like Brennan's going to be back end of next week. So, are you thinking the design will take this week? Did you have a timeline of of this with

Justin Ingram: I'd like to try to get going on design this week and get at least something live by the end of the week so we can start,

Margaret Northup: Brennan?

Justin Ingram: you know, going back and forth with the client by by next week and get it done wrapped up 100% by next week and then start working on the

Margaret Northup: Yeah.

Justin Ingram: integrations because I quoted I think a six week build and we're already two weeks in on the design. So, we got about I'd say two weeks of getting the site live and then two weeks to get all the integrations working

00:19:10

Margaret Northup: Okay.

Justin Ingram: is kind of like where we're at. So, like I think that's when we started kicking things off.

Margaret Northup: Okay. Yeah. Okay,

Justin Ingram: Maybe let me see here.

Margaret Northup: cool. Um,

Justin Ingram: When did they

Margaret Northup: I'm sure that's doable. I'm pretty sure they've already,

Justin Ingram: get

Margaret Northup: you know, they have all this in ClickUp, so they just needed more info.

Justin Ingram: We're like we're like a Yeah. So, basically we need to get the design built and ready to go in like a week and then the integration start in week two. So,

Margaret Northup: Okay.

Justin Ingram: yeah. So, I want to I don't want to lose a week if we can help it.

Margaret Northup: Yeah,

Justin Ingram: So,

Margaret Northup: we can um either add a call or I'll add a note to my calendar just to like reach back out by Friday to show you whatever the team has done and everything.

Justin Ingram: sweet.

Margaret Northup: Um so,

Justin Ingram: That'd be great.

Margaret Northup: okay.

Justin Ingram: Awesome. You're the best. Thank you for your help.

Margaret Northup: Awesome. Yep. Thank you. Just text us if you need anything.

Justin Ingram: Have a good night.

Margaret Northup: All right.

Justin Ingram: Okay.

Margaret Northup: Bye.

Justin Ingram: All right. See you.

Margaret Northup: Bye.
