

Regenerative Revival V2 — Dev Brief

Client: Seth Berge (Regenerative Revival) via Justin Ingram, ModFX
Engagement: Site rebuild + Phase 2 Wizlo telemedicine integration
Strategic context: VIP build; Wizlo partner pipeline projected at 3–4 builds/week; SOP deliverable required for repeatability

Strategic Positioning

Regenerative Revival is a White Glove Concierge brand operating in the regenerative medicine category. The site must reinforce premium positioning to support a sales funnel driven primarily by in-person dinner seminars. The current V1 build reads as commodity telehealth, which is misaligned with the client's brand position and downstream conversion environment.

Design north star: Luxury wellness brand with telehealth capability — not telehealth with premium styling.

Client-Stated Requirements (Source: Seth Berge, Loom 5/18)

Requirement	Client language
Brand positioning	"White Glove Concierge" (referenced 2x)
Visual tone	"Elevated, elegant, high-level"
Layout convention	Full-bleed sections, edge-to-edge
Differentiation target	Move away from "cookie-cutter telehealth" aesthetic
Funnel continuity	Site must extend the dinner-seminar experience
Palette signals	Gold (comparison site) + red (new mailer)

Build Priorities

- 1. Layout system — full-bleed by default.** Hero and feature bands extend edge-to-edge. Contained widths reserved for long-form body copy only. The boxed Divi-style sections on V1 are a documented client complaint.
 - 2. Photography — editorial-grade, branded.** V1 stock library is incompatible with the brand position. Source from client drive (Lovelyn organizing) or budget a new shoot.
 - 3. Typography + spacing — premium hierarchy.** Refined sans or serif pairing. Generous whitespace. Restrained motion. No template-grade animations.
 - 4. Palette — confirm gold + red against Figma.** Client cited both directly; raise with Justin if Figma does not reflect.
 - 5. Brand continuity — site, mailer, seminar materials.** Treat the printed mailer as a design reference point alongside Figma. Seminar attendees should experience visual consistency from event to web.
 - 6. Component library — luxury-grade primitives.** Full-bleed hero, condition cards, testimonial video module, FAQ accordion, sticky CTA, footer. Build for reuse across the projected Wizlo partner portfolio.
-

Confirmed Scope

- Home + product page templates (Figma supplied)
 - Inner pages: About, Services, Why Exosomes, Why Stem Cells, News, Contact
 - Wizlo telemedicine handoff — architected in Phase 1, integrated in Phase 2
 - SOP documentation deliverable
-

Measurement Plan (Phase 1)

Metric	Target	Rationale
Consult bookings / month	Baseline + lift TBD	Primary conversion event

Metric	Target	Rationale
Bounce rate, home + product pages	<50%	Validates brand fit with seminar-warmed traffic
Core Web Vitals (LCP / CLS / INP)	All green	Performance gates ad quality scores and SEO
Organic sessions, condition pages	Baseline + 30% in 90 days	SEO architecture investment ROI
Form completion rate	Baseline + lift TBD	Funnel health indicator

Tracking stack: GA4, Meta Pixel, call tracking, conversion events on consult booking. Baseline V1 metrics before migration to enable lift measurement.

Blocking Decisions (pending Justin call, 5/18 7:30 PM)

Decision	Downstream impact
CMS: WordPress vs. modern stack (Vercel/Next.js)	Timeline, performance ceiling, design fidelity
Wizlo handoff: embed / SSO / outbound	IA, lead capture flow, HIPAA posture
Figma alignment with client's Loom direction	Rework risk if Figma pre-dates feedback
Copy + photography sourcing	Timeline + brand quality ceiling
